tasks quickly and easily. You don't need to use the mouse to click the buttons you want to use or to copy and paste your data and texts. All you have to do is to select one of the actions you want to automate. Then, click on the "Go" button and the program does everything automatically. To add a new macro you first have to enter a name for your macro, select the target (the application you want to automate) and click on the "Go" button. Then, you have to define what actions you want to perform in the process. First, select one of the actions you want to perform (Open, Close, Move, Copy, Paste,...), then click on the "Add" button. The next step is to define what type of data you want to use. You have two choices: the built-in data or custom data (that you can save in a file you create). For example, you can use the built-in data to select a text block or a selection from the screen. The latter is one of the most common scenarios. You can paste the data in a Word file you created with any text editor (e.g. Notepad) or paste it directly in the Word window. The latter is the most convenient solution when you want to add some text to a Word file. You can also use custom data to select any data that you can save in a text or Excel file you created. In fact, you can use almost any type of data, even URL's and Images. You can also add custom actions. For example, you can use the program to open a new tab in your browser, or to open a new document. The possibilities are endless. How does it work? With Keymacro you can perform all your daily tasks quickly and easily. You don't need to use the mouse to click the buttons you want to use or to copy and paste your data and texts. All you have to do is to select one of the actions you want to automate. Then, click on the "Go" button and the program does everything automatically. Keymacro is an easy to use software. The only requirement is your mouse to navigate through the menus and the target you want to automate. There are no additional installation or configuration required. Keymacro Description: Keymac 77a5ca646e
